Mr. Matthew T. Wallen
Director
Office of Public Assistance, Governmental
Affairs & Compliance
Surface Transportation Board
395 E Street, SW
Washington, DC 20423

Dear Director Wallen:

Please find enclosed the status report for the month of July 2010 on operational matters related to CN's acquisition of the major portion of the Elgin, Joliet and Eastern Railway Company (EJ&E), as required in the Board's final decision served December 24, 2008 approving this transaction.

The enclosed report provides information on the following operational matters:

- *Interchanges:* the report lists the number of cars interchanged at each interchange location on the EJ&E for July 2010 (with separate sheets showing cars delivered, cars received, and total cars interchanged), and includes a comparison of July 2009 and July 2010 interchange numbers at each location.
- *Railroad at-grade crossings:* the report identifies delays at railroad interlockings along the EJ&E line that occurred during July 2010.
- *Accidents and injuries:* the report provides the date and descriptive information about each accident and injury that occurred on the EJ&E line or on CN lines through Chicago during July 2010. This report includes all accidents and injuries reported to FRA for these lines, regardless of whether

they fall below FRA's thresholds of significance. It also includes all incidents reported by CN to the Pipeline and Hazardous Materials Safety Administration (PHMSA) on DOT Form F 5800.1 (Hazardous Materials Incident Report).

- **Street crossing blockages:** the report provides data concerning each instance during July 2010 where a crossing was blocked for 10 minutes or more. This report includes two items: (1) a summary table and raw data for EJ&E crossings equipped with Remote Terminal Units (RTUs), which show all notifications from the RTUs of automated crossing warning device activations (ACWDs) for 10 minutes or more, regardless of the cause, as reported by our vendor, Progress Rail; and (2) a monthly blocked crossing report for July 2010, which includes all known street crossing blockages on EJ&E lines of 10 minutes or more.

As can be expected, the total number of notifications on the Progress Rail summary sheet does not precisely match the total number of ACWD notifications on the blocked crossing report. There are some notifications reported in the Progress Rail data that were removed from the final blocked crossing report because they were based on events that did not result in gates remaining down 10 minutes or more (e.g., because jumpers were in use or the crossing was flagged to allow cars to cross). In addition, several separately reported ACWD activations in the Progress Rail data actually represented a single ACWD activation event and were thus combined in the final report.

Conversely, CN added to its report a significant number of notifications for Woodruff Road that were not included in the Progress Rail data. The Progress Rail data did not include most ACWD activations between July 10 and July 13 because, as a result of programming work, the Woodruff Road RTU was not functioning during that period. CN tried to account for this missing period by using records from its dispatching system and assuming and adding an RTU activation to the final report each time the broader signal block encompassing Woodruff Road was activated for 10 or more minutes, which almost certainly overstated the actual number of times Woodruff Road itself was blocked for 10 or more minutes.

The total number of activations in July increased as compared to June. A number of factors contributed added activations this month. In addition to the likely overstatement of Woodruff Road activations noted above, additional blockages were created this month due to CN's removal of spring switches and installation of new bi-directional power switches at each end

of the Frankfort siding, including corresponding signal work on CN's main line. This work, which was conducted July 20 – 24, took the Frankfort siding out of service and required restricted train speeds on the EJ&E main line between Frankfort and Joliet. As a result, a significant number of total additional ACWD activations were caused at crossings in the area. The shift in interchange from Glenn Yard to Joliet Yard for CN's receipt of BNSF traffic beginning June 25 also caused an increase in blockages for crossings in the Joliet Yard/H Yard area (e.g., Woodruff Road, Collins Street, Henderson Avenue, and Royce Avenue). Finally, reduced speeds in response to flash flood warnings and high winds on July 23 – 24 resulted in added ACWD activations those days.

Altogether, almost 30 percent of all blockages on the CN report were related to Joliet Yard/H Yard. A total of 217, or over 16 percent, were at Woodruff Road alone which, in addition to possibly being overstated (as discussed above), is a location where an alternative grade-separated road is available. The CN report also includes 45 ACWD activations for private crossings, with 33 accounted for by Marina Lot Drive, which is a seldom-used road closed by a locked gate. Finally, the report includes 58 blockages that were not caused by operations on the EJ&E line, but rather by operations on other lines that cross or are parallel to EJ&E's lines and share crossing protection (e.g., Chicago South Shore and South Bend Railroad at Taylor Forge Road).

- *Train volumes:* the report provides train counts for operations over segments of EJ&E's principal lines and on CN lines through Chicago during July 2010.

Please also note the following updates regarding our operations and related activities on the EJ&E.

- During July 2010, as we continue to process more traffic at Kirk Yard, we had an increase of two trains per day in each direction traversing the segments between Kirk Yard and Griffith (EJ&E Segments 1-4). Also, on August 3, UP began running an average of 3.6 additional intermodal trains per day between West Chicago and Joliet (EJ&E Segments 8-11) using existing trackage rights.
- On July 11, CN Police arranged for Little Obie to participate in the West Chicago Railroad Days Parade. Aboard Little Obie during the parade were the Railroad Days Parade Grand Marshall and seven members of the West Chicago Middle School who recently won a national competition related to railroad safety.

- On July 21, Special Agent Eric Graf conducted an Operation Lifesaver presentation during the Schererville Police Day Camp at the Tri-Town Safety Village in Schererville, Indiana. A total of 14 Youth Police Explorers, and four Schererville Police Officers were in attendance.
- On July 22, CN Police met with the West Chicago Chief of Police to coordinate scheduling of future Grade Crossing Collision Investigation classes for police departments along the EJ&E line.

Please do not hesitate to contact me if you or your colleagues have any questions on this report or need additional information on CN's Chicago-area operations.

Sincerely,

CN		
7/9/2010	JOLIET	Product was discovered leaking out of the dome on the top of a tank car at Glenn Yard. The car was isolated and the Dangerous Goods Officer ("DGO"), the CN Police, and the shipper were notified. A minimal amount of product leaked from the dome and most of it evaporated. There were no injuries or exposures.
7/16/2010	JOLIET	A tank car was discovered leaking at Glenn Yard. The car was isolated, and the DGO, the CN Police, and the shipper were notified. There were no injuries or exposures.
7/26/2010	JOLIET	Product was found dripping from the bottom outlet area of a tank car shortly after arrival from the BRC at Glenn Yard. All appropriate departments were notified, and the tank car was isolated. CN's response team attempted to tighten the flange bolts, and the leak slowed to approximately 6-10 drips per minute, but did not stop. The shipper was notified and was required to obtain FRA Movement Approval prior to releasing the car.

July 2010 data for August 2010 report**

Event date	Subdivision	Narrative
CN		
7/5/2010	CHICAGO	Employee was operating locomotive during normal switching operations when slack caused a car to strike the locomotive after it had stopped the movement. Employee stated he felt a slight discomfort in his left shoulder, resulting in upper back strain.
7/8/2010	WAUKESHA	Employee was opening the gate to enter a shipper facility when he felt a sharp pain on the back of his left arm and noticed a "yellow jacket". Employee notified engineer that he had been stung and was allergic to bee stings. Engineer contacted local EMS and ambulance transported employee to local medical center for treatment.
7/10/2010	CHICAGO	Employee was using a forklift to align a new truck on a drop table. The employee was pulling a chain off the end of the forklift, but grabbed it in the middle, instead of the end, which caused it to unravel, and strike the top of his right foot, resulting in a contusion.
7/13/2010	JOLIET	In the process of replacing a broken thrower on a railcar, an employee was lifting the knuckle to put it back in place when his right foot slipped on a white powdery substance causing a sharp pain in his back and numbness in his right leg.
7/27/2010	FREEPORT	Employee was sitting in the right side operator's seat of a spike-puller machine, making repairs to the hand controller, when another machine that was traveling on the same track struck the rear of the spike-puller machine he was working on, resulting in a lower back strain and contusions.
EJ&E		
7/22/2010	MATTESON	Employee was assisting track forces in changing out a broken switch point when a bolt caught his glove and pinched his hand between the bolt and rod, resulting in a laceration to his hand.
