Ms. Lucille Marvin
Acting Director
Office of Public Assistance, Governmental
Affairs & Compliance
Surface Transportation Board
395 E Street, SW
Washington, DC 20423

Dear Acting Director Marvin:

Please find enclosed the status report for the month of July 2011 on operational matters related to CN's acquisition of the major portion of the Elgin, Joliet and Eastern Railway Company (EJ&E), as required in the Board's final decision served December 24, 2008 approving this transaction.

The enclosed report provides information on the following operational matters:

- ***Interchanges:*** the report lists the number of cars interchanged at each interchange location on the EJ&E for July 2011 (with separate sheets showing cars delivered, cars received, and total cars interchanged), and includes a comparison of July 2010 and July 2011 interchange numbers at each location.
- ***Railroad at-grade crossings:*** the report identifies delays at railroad interlockings along the EJ&E line that occurred during July 2011.
- ***Accidents and injuries:*** the report provides the date and descriptive information about each accident and injury that occurred on the EJ&E line or on CN lines through Chicago during July 2011. This report includes all accidents and injuries reported to FRA for these lines, regardless of whether

they fall below FRA's thresholds of significance. It also includes all incidents reported by CN to the Pipeline and Hazardous Materials Safety Administration (PHMSA) on DOT Form F 5800.1 (Hazardous Materials Incident Report).

- **Street crossing blockages:** the report provides data concerning each instance during July 2011 where a crossing was blocked on EJ&E for 10 minutes or more. This report includes two items: (1) a summary table and raw data for EJ&E crossings equipped with Remote Terminal Units (RTUs), which show all notifications from the RTUs of automated crossing warning device (ACWD) activations for 10 minutes or more, regardless of the cause, as reported by our vendor, Progress Rail; and (2) a monthly blocked crossing report for July 2011, which includes all known street crossing blockages on EJ&E lines of 10 minutes or more.

There was a minor increase of 2% in the total number of blockages this month. Joliet and West Chicago continued to experience high numbers of blockages: 620 in Joliet (a 4.2% increase) and 173 in West Chicago (a 7.5% decrease). The increase in blockages at Joliet was primarily attributable to a significant increase in the number of blockages at Washington Street (from 44 to 73), where CN has continued to experience a high number of generally brief blockages as a result of signal delays at Metra's Rock Island interlocker. Woodruff Road, which again was the location with the highest number of blockages, also saw a slight increase (from 240 to 263).

This month's report includes a total of 26 blockages at Marina Lot Drive, which is a seldom-used crossing closed by a locked gate. In addition, the report includes 74 blockages that were not caused by operations on the EJ&E line, but rather by operations on other lines that cross or are parallel to EJ&E's lines and share crossing protection (e.g., Chicago, South Shore and South Bend Railroad and Taylor Forge Road). There was also a significantly increased number of blockages caused by gate malfunctions this month (27 instances). This increase was related to unusually severe weather in the Chicago area, particularly in the latter half of the month.

CN installed one additional RTU this month, on July 29, at the Front Street crossing in Indiana, on EJ&E's Lake Front subdivision.

- **Train volumes:** the report provides train counts for operations over segments of EJ&E's principal lines and on CN lines through Chicago during July 2011.

Please also note the following updates regarding our operations and related activities on the EJ&E.

- A number of crossings were closed to vehicular traffic this month for construction or resurfacing projects. The Industrial Road crossing was closed between July 5 at 8:00 AM and July 8 at 6:00 PM; Arcadia Road between 7:00 AM and 9:00 AM on July 9; Rockland Road between 9:30 AM and 12:00 PM on July 9; Telegraph Road between 8:45 AM and 11:00 AM on July 16; Clayton Street between 11:30 AM and 1:00 PM on July 16; Cherry Hill Road crossing was closed between July 11 at 6:30 AM and July 23 at 11:00 AM. In addition, Main Street in Matteson, IL, remained closed for the month to complete track relocation and street rebuilding.
- Between July 4 – 10, CN Police, in conjunction with the West Chicago, Illinois Police Department and Illinois Operation Lifesaver, conducted education and enforcement activities in connection with the Village of West Chicago's Train Safety Awareness Week. In conjunction with this initiative, CN Police staffed an Operation Lifesaver Booth on July 8, from 5:00pm to 11:00pm, at Reed-Kepler Park for the West Chicago Railroad Days Festival. Approximately 500 people attended.
- On July 7, CN Police participated in a joint force education and enforcement blitz with the West Chicago Police Department. A total of three citations were issued for railroad-related offenses, and 50 railroad safety brochures were distributed to motorists and pedestrians at the Washington Street highway-rail grade crossing in West Chicago.
- On July 9, from 12:00pm until 5:00pm, CN Police participated in Griffith's American Legion Post 66 Railroad Days by staffing an Operation Lifesaver Booth and making an Operation Lifesaver presentation to those in attendance at the Railroad Days event in Griffith, Indiana. Approximately 300 attendees visited the Operation Lifesaver Booth, and 50 attendees participated in the Operation Lifesaver presentation.
- On July 20, CN Police participated jointly with officers from the Plainfield, Illinois Police Department, along with officers from the UP and BNSF Railroad Police Departments, in a traffic safety enforcement blitz at the Main Street highway-rail grade crossing in Plainfield. A total of 26 citations were issued for railroad related traffic offenses (20 citations for Blocking a Railroad Crossing; three citations for Not Wearing a Seat Belt; one warning citation for Not Wearing a Seat Belt; and two citations for No Proof of Insurance).

07/03/11	LAKEFRONT	Trainmaster was notified by FRA inspector that product (Xylene) was leaking from the top of a tank car. CN's response team responded, noting that all covers, housing, and valve seals were intact, but that the thermometer well was less than tool tight, allowing product to escape during movement. An epoxy was applied to the base of the thermometer well at the pressure plate, the car was then pressure tested for leaks, and was then released for movement.
07/03/11	LAKEFRONT	Trainmaster was notified by FRA inspector that fresh product (Petroleum Distillates) was on the manway nozzle and top of a tank car. The car was isolated in track and the shipper's response contractor responded, noting that the manway was seal intact but 2 manway gaskets were installed (cover and nozzle) allowing product to escape during movement. One gasket was removed, the car was secured, the leak was tested, and the car was released for movement.
07/24/11	MATTESON	Yard job was switching cars when a few cars, which did not have a properly set handbrake, rolled out of track and struck cars in another track. No cars derailed but 3 cars were damaged by the impact.
