Ms. Lucille Marvin
Director
Office of Public Assistance, Governmental
Affairs & Compliance
Surface Transportation Board
395 E Street, SW
Washington, D.C. 20423-0012

Dear Director Marvin:

In keeping with CN's representation that it would do so, CN is hereby refiling a number of its train count reports submitted in its monthly operations reports on implementation of the EJ&E transaction to reflect refinements and corrections it has made to the methodology used to generate those reports.

CN has worked continuously since the start of its monthly operational reporting to improve the methodology by which it generates its train counts for EJ&E lines and CN's lines through Chicago.¹ Many of the challenges to creating accurate train volume reports were outlined in HDR's Compliance Support Verification Final Report (April 2010). These include accounting for such things as reverse movements, truncated movements, boundaries between adjacent segments, and foreign trains operating on the EJ&E, as well as the need to manually transfer data between data bases and into the final report to the STB.

CN believes it has now successfully resolved the issues identified by HDR, plus additional issues it has identified itself related to the train count report. CN has done so by making a number of modifications to its reporting methodology, including the following:

¹ CN has previously discussed a number of these improvements. See CN's Comments on the Compliance Support Verification Final Report of HDR Engineering, Inc. (CN-62), at pp. 20-21 (filed May 28, 2010); Letter from K. Phillips to M. Wallen, at p.2 (dated March 10, 2010) (cover letter to CN's February 2010 operating report to the STB).

- CN implemented a new methodology to account properly for “turn trains.” A turn train is a local train that performs a round trip movement (e.g. from Markham Yard to Kirk Yard and back) in the same day. The original methodology counted each such train just once when, in fact, it traversed each segment twice because it is a round trip train. CN’s modified methodology identifies and properly counts these trains.
- CN created a process for identifying and accurately accounting for the relatively unusual circumstance in which a train makes a “truncated” movement, meaning that it does not complete its full scheduled movement. CN had been counting such trains as if they had traversed all segments in their schedules, thus causing an overstatement in some segments.
- CN made minor adjustments to the endpoints of a small number of reporting segments to better align the locations of CN’s reporting stations in SRS (CN’s system-wide train and car scheduling management system) and control points in TMDS (CN’s train dispatching system), both of which are used to record train movements, with the segments as defined in CN-EJ&E operating plan.
- CN made two changes to improve its counting of trackage rights trains.
 - CN was able to improve the quality of the trackage rights data used in the report by using more refined data that were not generally available in time for CN’s original reporting deadline, which was the 10th day of each month, but are generally available for CN’s later reporting deadline, the 15th day of each month, which has been in effect since November 15, 2010.
 - CN simplified and improved the accuracy of its methodology for converting into a compatible format and combining trackage rights train data from TMDS into CN’s SRS data base, which captures information for all other trains.²

In order to assure the Board received the most accurate and up to date counts as CN was making incremental improvements to its reporting processes, CN applied those changes as they were developed and implemented over time. Thus, for example, CN implemented its improved methodology for counting turn trains

² Problems with this methodology were discovered in preparing our monthly operating report for filing in September, 2011. That discovery prompted CN to undertake a detailed review of prior monthly reports to identify and correct any similar errors. That process has now been completed.

beginning with the monthly operating report filed in March, 2010.³ Although this approach minimized errors, in accordance with CN's representation to the Board, CN has restated all prior reports between July, 2009 (when CN's SRS database was first extended to the EJ&E territory) and August 2011 (the last date for which a restatement correction is required), using its refined methodology.⁴ This will harmonize the data for all months prior to September 2011 to reflect differences in the timing of the improvements and provide the Board and the public with the most accurate set of reports for those months. Hard copies of the restated reports are enclosed, along with a disc containing electronic copies.

The changes reflected in the restated reports (which include increases and decreases) are modest. In order to assist the Board in reviewing and understanding those changes, I have also enclosed an electronic version of a spreadsheet that shows month-by-month, for each segment, the original reported count, the revised count, and the change. I am also enclosing a hard copy and electronic version of a summary table of the information from the spreadsheet. The summary shows for each segment the average train count as originally filed, the average as restated, and the average change (stated as an absolute value, so that changes do not cancel each other out). As added context, the summary also shows the pre-transaction base train count and, for the CN and EJ&E segments, projected volumes. As shown at the bottom of the change column, the overall average change is 0.6 trains per day, and the median change is 0.3 trains per day.

Please do not hesitate to contact me if you or your colleagues have any questions or require any additional information concerning these restated reports.

Sincerely,

Karen Borlaug Phillips
Vice President – Public and
Government Affairs

Enclosures

³ See Letter from K. Phillips to M. Wallen, at p.2 (dated March 10, 2010).

⁴ See *id.* See, also, HDR Compliance Support Verification Final Report, at 7 & App. 3 at 8 (noting CN's representation that it would restate its train count reports beginning with July 2009).
